We supply high quality and delicious fruit trees of a good size, well adapted for the Scottish climate. Our aim is to make it easy for people to grow delicious fruit and to enjoy the simple pleasure of picking and eating fruit from the tree. We are also keen to promote old heritage varieties which are rarely seen.

We are also delighted to have added a number of Irish varieties and Welsh varieties – such as Widow's Friend and Irish Pippin to the list.

Our apple trees are mainly on MMIO6 rootstock (semi-dwarfing) available for deliver from late November(the trees have to be dormant to move) at the start of the tree planting season. Plums and Pears are also on suitable semidwarfing rootstock. We do not recommend more dwarfing varieties for Scotland as they lack the necessary robustness to thrive. Pears, cherries and plums will also be supplied on semi dwarfing rootstock. Trees will be available Nov – April. Stocks of some varieties are limited and early ordering is highly recommended to ensure best selection and an early delivery.

Trees cost £25 per trees. We also have a limited range of larger 3 and 4 year trees POA. Please ask us for prices for bulk orders. Stakes, Ties, Labels and other orchard essentials can be supplied. Postage and packing £15 per bundle of up to 8 trees. Please contact us for help with stock selection and other queries. Please note that we can also provide a fair variety of Scottish soft fruit on request.

We are happy to help you select varieties suitable for your location... I'm happy to discuss by phone, but it is often very helpful to have details of the site, photos of the site, and info on soil conditions sent by email prior to the call.

Court Pendu Plat (Roman origin)	Yes	Court Pendu Plat is a very rare, very old apple. The name probably means "short stalk' in French. Believed to have been introduced to Britain by the Romans, it was widely cultivated in the days of Queen Elizabeth 1st, and known as 'The wise apple' as it blossomed very late and so was not damaged by frost. It is now extremely rare, and I'm keen to ensure it survives as a variety.	
Devonshire Quarrenden (Blood of the Boyle)	Yes	Excellent Eater - Has been grown in Scotland for 200 years plus. Arose Devon or France before 1670. Widely-grown throughout UK in 19th century. Dark crimson flush on yellow background. Eaten early, good, strawberry flavour. Grown and known in Ireland as the Blood of

Emneth Early, Early Victoria	Yes	Does well in Edinburgh – and I also have been testing in Glasgow and it does well here.	
Galloway Pippin	Yes	Galloway's finest. This dual- purpose variety is believed to have originated in Wigtownshire, perhaps at Wigtown Abbey, 1871 when it was first recorded. Keeps shape on cooking – crisp eating.	
George Cave	Yes	One of our best tasty early eating apple, ready Late Aug. Originating in England in 1923. One of John Butterworth's favourites.	
Golden Monday	Yes	- a rare apple - mentioned in Hogg's Pomology. "A Very excellent apple of first quality"	
Golden Pippin	Yes	Sussex UK 1629 Grown across Scotland - very old variety.
